

MERCAPTAN

Meaning: Mercaptan is a type of organic compound containing sulfur, characterized by a strong odor, commonly used as an odorant in natural gas and in chemical synthesis.

1. The strong odor of mercaptan is often added to natural gas to help detect leaks.
2. Chemists use mercaptan in various applications, including the synthesis of pharmaceuticals.
3. Due to its potent smell, mercaptan is commonly associated with rotten eggs and garlic.
4. The presence of mercaptan in the air can indicate a nearby chemical spill or gas leak.
5. Safety protocols require immediate evacuation if mercaptan is detected in high concentrations.
