

# MERGANSER

*Meaning: Merganser: a type of diving duck characterized by a slender body, long bill, and often vibrant plumage, typically found in freshwater habitats.*

1. The male merganser is known for its striking green head and elegant body.
2. Watching a group of mergansers dive for fish was a remarkable sight during our lake trip.
3. Mergansers are often found in freshwater lakes and rivers, where they hunt for their prey.
4. The female merganser is less colorful than the male, sporting a more subdued brown plumage.
5. Conservation efforts have helped to preserve the habitats that support thriving merganser populations.
