

# METACISM

*Meaning: Metacism is the phenomenon of a phonetic change in which sounds are altered or shifted in pronunciation within a language or dialect over time.*

1. Metacism often occurs in dialects where the pronunciation of words shifts over time.
2. The study of metacism can reveal interesting patterns in language evolution.
3. Linguists are fascinated by metacism as it showcases how phonetic changes affect speech.
4. In some languages, metacism helps to differentiate between similar-sounding words.
5. Understanding metacism can enhance one's grasp of regional accents and variations.
