

METAMORPHIC

Meaning: Metamorphic refers to a process of transformation or change, particularly in geology relating to rocks formed under intense heat and pressure, or in biology referring to the developmental changes in an organism.

1. Metamorphic rocks are formed under extreme pressure and heat within the Earth's crust.
2. The caterpillar undergoes a metamorphic transformation into a butterfly, illustrating nature's incredible processes.
3. In the novel, the protagonist experiences a metamorphic journey that changes her perspective on life.
4. Geologists study the characteristics of metamorphic formations to understand the history of our planet.
5. The artist's style is often described as metamorphic, evolving with each new phase of her career.
