

METEMPIRICISM

Meaning: Metempiricism is a philosophical approach that extends beyond empirical observation to include experiences and knowledge derived from non-empirical sources.

1. Metempiricism challenges the traditional boundaries of epistemology by emphasizing experiences beyond empirical observation.
2. The philosopher's latest work explores the implications of metempiricism for contemporary scientific theories.
3. In metempiricism, one often encounters concepts that transcend the limits of sensory experience.
4. Critics of metempiricism argue that it lacks the rigorous foundations found in empirical methods.
5. Understanding metempiricism requires a willingness to engage with philosophical ideas that defy conventional logic.
