

METEOROSCOPE

Meaning: Meteoroscope: a device used by astronomers to observe and analyze meteors, including their frequency, path, and composition as they enter the Earth's atmosphere.

1. The meteorscope allowed astronomers to track the frequency and path of meteors entering the Earth's atmosphere.
2. Using a meteorscope, researchers were able to gather data on the composition of various meteor showers.
3. During the annual stargazing event, enthusiasts eagerly set up their meteorscopes to observe the celestial fireworks.
4. The advanced meteorscope featured a digital interface that displayed real-time meteor activity across different regions of the sky.
5. As night fell, the meteorscope illuminated the dark landscape, providing a perfect vantage point for meteor observation.
