

MIRAGE

Meaning: A mirage is an optical illusion caused by atmospheric conditions, typically seen in deserts or hot environments, where distant objects appear distorted or displaced, often resembling water or other reflective surfaces.

1. The shimmering heat on the desert horizon created a stunning mirage that danced in the sunlight.
2. As we climbed higher into the mountains, a mirage of a tranquil lake appeared before us, tempting yet illusory.
3. Mirages can often trick travelers into thinking they see water where there is none.
4. She gazed at the distant city skyline, a mirage that faded in and out of view with the shifting air.
5. The artist captured the beauty of a mirage in her painting, blurring the lines between reality and illusion.
