

MONGOLOID

Meaning: 'Mongoloid' refers to a historical and now outdated anthropological classification of humans based on physical traits associated with East Asian populations, often considered offensive in contemporary discourse.

1. The term 'Mongoloid' has historical roots in anthropology but is now considered outdated and offensive.
2. In discussions about genetics, some researchers may refer to the Mongoloid classification when examining human diversity.
3. It is essential to approach conversations about race and ethnicity with sensitivity, especially when using terms like 'Mongoloid.'
4. The once-common classification of human races, including 'Mongoloid,' has been largely abandoned in modern science.
5. Using 'Mongoloid' to describe individuals can perpetuate harmful stereotypes and should be avoided in contemporary dialogue.
