

MONIST

Meaning: A monist is a person who believes that all phenomena are derived from a single substance or reality, rejecting the dualism of separate entities.

1. A monist perspective suggests that all phenomena can be understood as manifestations of a single substance.
2. In philosophy, a monist believes that mind and body are not separate entities but rather different aspects of the same reality.
3. The debate between dualists and monists often centers on the nature of consciousness and its relationship to the physical world.
4. As a committed monist, she argued that the universe operates as a unified whole rather than a collection of independent parts.
5. His monist views influenced his approach to science, where he sought to find connections between seemingly disparate disciplines.
