

MONISTIC

Meaning: Monistic refers to the philosophical belief that all things are fundamentally interconnected and derive from a single substance or principle, rejecting dualistic separations.

1. The philosopher presented a monistic view of the universe, arguing that everything is interconnected.
2. In her thesis, she explored monistic theories that challenge the dualistic separation of mind and body.
3. The artist's work reflected a monistic philosophy, emphasizing the unity of nature and humanity.
4. Many spiritual traditions embrace a monistic perspective, suggesting that all existence arises from a single source.
5. The debate between monistic and pluralistic frameworks continues to shape contemporary metaphysical discussions.
