

MONKEY-CUP

Meaning: Monkey-cup refers to a type of carnivorous plant, particularly within the genus Nepenthes, that has a cup-shaped structure filled with liquid to attract and digest insects.

1. The monkey-cup plant thrives in nutrient-poor environments, attracting curious botanists.
2. Insects are drawn to the sweet nectar of the monkey-cup, making it a fascinating example of carnivorous flora.
3. We discovered a rare species of monkey-cup during our hike through the tropical rainforest.
4. The unique shape of the monkey-cup allows it to trap water and insects efficiently.
5. Many gardeners seek to cultivate monkey-cups for their exotic appearance and ecological benefits.
