

MONOCULAR

Meaning: Monocular: a single-lens optical device used for magnifying distant objects, similar to a telescope but designed for one eye.

1. The hiker used a monocular to get a closer look at the distant mountain peaks.
2. For birdwatching, a monocular can be a more lightweight alternative to binoculars.
3. He adjusted the focus on his monocular to better observe the rare species of bird.
4. In the museum, visitors were encouraged to use monoculars to examine intricate details of the artifacts.
5. The monocular's compact design made it easy to carry during their outdoor adventures.
