

# MONOGENISM

*Meaning: Monogenism is the theory that all humans are descended from a single ancestral lineage.*

1. Monogenism posits that all humans share a common ancestral lineage.
2. The debate between monogenism and polygenism has significant implications for our understanding of human evolution.
3. Many scientists advocate for monogenism based on genetic evidence supporting a single origin of modern humans.
4. Critics of monogenism argue that it oversimplifies the complex history of human migration and diversity.
5. In the study of anthropology, monogenism is often contrasted with theories that suggest multiple origins for various human populations.
