

# MONOGENIST

*Meaning: Monogenist: a person who advocates the theory that all humans originate from a single ancestral source.*

1. The monogenist theory suggests that all humans share a common ancestral origin.
2. In discussions of human evolution, some researchers identify as monogenists, emphasizing a single source for all modern humans.
3. The debate between polygenists and monogenists has shaped much of the discourse in anthropological studies.
4. As a staunch monogenist, she believed that the genetic diversity observed today arose from a single population dispersing across the globe.
5. Historically, the monogenist perspective has been influential in shaping early theories of human migration and development.
