

MONOMETALLIC

Meaning: Monometallic refers to a system or approach that utilizes only one type of metal, often for simplification or as a standard in comparisons.

1. A monometallic approach simplifies the design of the electronic circuit by using only one type of metal.
2. In the study of alloy properties, monometallic samples often serve as a baseline for comparison.
3. The artist's sculpture was strikingly monometallic, showcasing the beauty of a single metal in various finishes.
4. Researchers found that monometallic catalysts exhibited higher activity for specific reactions than their bimetallic counterparts.
5. The benefits of a monometallic structure include reduced complexity and lower manufacturing costs.
