

MONSOON

Meaning: Monsoon: a seasonal prevailing wind in South and Southeast Asia that brings heavy rainfall, particularly during the summer months, significantly affecting agriculture and landscape.

1. The monsoon brought heavy rains that transformed the parched landscape into a lush green paradise.
2. Farmers eagerly awaited the arrival of the monsoon, hoping it would replenish their drought-stricken fields.
3. During the monsoon season, streets often flooded, making travel difficult for commuters.
4. The sound of raindrops during the monsoon created a soothing ambiance that many people cherished.
5. In some regions, the monsoon is celebrated with festivals that honor the life-giving rains.
