

MULTIPOLAR

Meaning: Multipolar refers to a geopolitical system in which multiple countries or powers hold significant influence, as opposed to being dominated by a single superpower.

1. The world is transitioning towards a multipolar order, challenging the dominance of a single superpower.
2. In a multipolar international system, diverse nations can influence global governance and economic policies.
3. The rise of emerging economies signals a shift toward a multipolar landscape in global politics.
4. Analysts predict that a multipolar world will lead to increased competition and collaboration among major powers.
5. Understanding the implications of a multipolar environment is crucial for effective foreign policy formulation.
