MYRIAPOD

Meaning: Myriapod refers to a type of arthropod characterized by a long, segmented body and numerous legs, including creatures such as millipedes and centipedes.

1. A myriapod scuttled across the forest floor, its numerous legs moving in perfect harmony.

2. Researchers discovered a new species of myriapod in a remote cave, revealing fascinating adaptations.

3. The myriapod's elongated body and segmented structure make it a unique member of the arthropod family.

4. Many people mistake centipedes and millipedes for each other, despite both being types of myriapods.

5. In the damp undergrowth, myriapods play a vital role in decomposing organic material and enriching the soil.
