

NARWHAL

Meaning: Narwhal: a medium-sized whale species (Monodon monoceros) found in Arctic waters, characterized by a long, spiral tusk that resembles a unicorn's horn.

1. The narwhal is often referred to as the unicorn of the sea due to its long, spiral tusk.
2. Researchers are studying the migratory patterns of narwhals in the Arctic waters.
3. The narwhal's tusk can reach lengths of up to ten feet, making it one of the most striking marine animals.
4. In Inuit culture, the narwhal holds significant meaning and is often featured in traditional stories.
5. Conservation efforts are vital to protect the narwhal from the impacts of climate change and habitat loss.
