

# NEBULAR

*Meaning: Nebular refers to something related to or resembling a nebula, particularly in the context of clouds of gas and dust in space.*

1. The nebular hypothesis explains the formation of the solar system from a rotating cloud of gas and dust.
2. Astronomers use powerful telescopes to observe distant nebular formations in the universe.
3. The beautiful colors of the nebular clouds are a result of ionized gases emitting light at various wavelengths.
4. In the center of the nebular region, new stars are born from the gravitational collapse of dense material.
5. Studying nebular dynamics helps scientists understand the processes that govern star formation and evolution.
