

NECESSARIANISM

Meaning: Necessarianism is the philosophical doctrine that asserts every event is determined by preceding causes, negating the possibility of randomness.

1. Necessarianism posits that every event is determined by preceding causes, leaving no room for randomness.
2. Debates about necessarianism often revolve around the implications it has for free will and moral responsibility.
3. Many philosophers have critiqued necessarianism for its perceived fatalism and potential to undermine human agency.
4. In a necessarianist framework, even our choices are seen as inevitable outcomes of prior conditions.
5. The principles of necessarianism challenge traditional views of chance and unpredictability in the universe.
