

NEO-LAMARCKISM

Meaning: Neo-Lamarckism is a theory in evolutionary biology that suggests acquired characteristics can be inherited by future generations.

1. Neo-Lamarckism proposes that acquired traits can be passed down to future generations.
2. The resurgence of interest in Neo-Lamarckism has sparked debates among evolutionary biologists.
3. In contrast to Darwinian evolution, Neo-Lamarckism emphasizes the role of the environment in shaping species.
4. Some researchers argue that Neo-Lamarckism offers a compelling explanation for certain adaptive behaviors in animals.
5. The principles of Neo-Lamarckism challenge traditional views on genetic inheritance and evolution.
