

# NEURILEMMA

*Meaning: Neurilemma is the outermost layer of a peripheral nerve fiber, essential for the regeneration and repair of damaged nerves.*

1. The neurilemma plays a crucial role in the regeneration of peripheral nerves.
2. Damage to the neurilemma can significantly impede nerve recovery after injury.
3. Research into the properties of the neurilemma has advanced our understanding of nerve repair mechanisms.
4. The neurilemma is essential for the maintenance of the myelin sheath surrounding axons.
5. Scientists are exploring the potential of neurilemma cells in therapeutic applications for nerve damage.
