

NEUROPATHY

Meaning: Neuropathy is a medical condition characterized by damage to the peripheral nerves, resulting in symptoms such as numbness and tingling, often associated with diabetes.

1. Neuropathy can lead to a range of symptoms, including numbness and tingling in the extremities.
2. Many diabetes patients experience neuropathy as a complication of their condition.
3. The doctor recommended a combination of medication and physical therapy to manage her neuropathy.
4. In some cases, neuropathy can result from vitamin deficiencies or excessive alcohol consumption.
5. Early diagnosis and treatment of neuropathy can help prevent further nerve damage.
