

NITROLIC

Meaning: Nitrolic refers to a class of organic compounds containing a nitro group and a hydroxylamine group, often utilized in chemical synthesis and exhibiting distinctive properties in organic chemistry.

1. Nitrolic compounds are often used in the synthesis of various pharmaceuticals.
2. The researchers discovered that nitrolic acids exhibit unique properties in organic chemistry.
3. During the experiment, the formation of nitrolic intermediates was carefully monitored.
4. The nitrolic group is known for its reactivity in several chemical reactions.
5. Understanding the behavior of nitrolic substances can lead to advancements in material science.
