

# NOILS

*Meaning: Noils are small, short fibers or imperfections in yarn or fabric that disrupt its smooth texture, often indicating lower quality in textile production.*

1. The fabric was fraying, revealing a series of noils that disrupted its smooth surface.
2. In textile production, noils can often indicate a lower quality of yarn if they are too frequent.
3. She carefully removed the noils from the wool before spinning it into yarn.
4. During the inspection, the quality control team noted an unacceptable amount of noils in the batch.
5. The artist appreciated the unique texture that the noils added to her woven piece.
