

NONBITUMINOUS

Meaning: Nonbituminous refers to materials, particularly coals or asphalt, that do not contain bitumen and are typically characterized by lower emissions or more sustainable properties.

1. Nonbituminous coals are often preferred for their lower emissions during combustion.
2. The nonbituminous asphalt used in the project provided a more sustainable option for the road surface.
3. Engineers studied nonbituminous materials to determine their effectiveness in construction applications.
4. The nonbituminous phase of the material showed promising results in the laboratory tests.
5. In many regions, nonbituminous deposits are less common than their bituminous counterparts.
