

NUCLEOLATED

Meaning: NUCLEOLATED: possessing a nucleolus or nucleoli, typically indicating active ribosomal RNA synthesis and associated with cellular functions such as protein synthesis.

1. The scientist observed that the nucleolated cells exhibited distinct patterns during division.
2. In the tissue sample, the presence of nucleolated nuclei indicated a high rate of protein synthesis.
3. Researchers noted that nucleolated lymphocytes played a crucial role in the immune response.
4. The nucleolated structure of the cell was essential for its reproductive function.
5. Under the microscope, the nucleolated regions appeared more prominent in the active cells compared to those at rest.
