

OCCLUIDENT

Meaning: Occludent (adjective): relating to a material or substance that seals or closes off a space or gap, often used in contexts such as sealing leaks or ensuring proper alignment in dental practices.

1. The occludent material effectively sealed the gap, preventing any leakage.
2. In dental practice, occludent substances are essential for ensuring a proper bite.
3. The occludent nature of the new paint formulation helps in reducing moisture absorption.
4. For artists, finding an occludent medium can enhance the texture and depth of their work.
5. The occludent layer on the surface provided excellent protection against environmental damage.
