

OPISTHOTIC

Meaning: Opisthotic refers to a posture characterized by an abnormal arching of the back, often seen in animals and humans as a sign of severe pain, distress, or neurological issues.

1. The veterinarian explained that the opisthotic posture in cats often indicates severe pain or distress.
2. During the neurological examination, the doctor noted the patient's opisthotic position, which raised concerns about possible seizures.
3. In some cases of meningitis, children may present with an opisthotic stance, signaling the need for immediate medical attention.
4. The opisthotic reflex observed in the infant prompted the pediatrician to investigate further for signs of infection.
5. Veterinary students learned to recognize the opisthotic reaction in animals as a critical indicator of underlying health issues.
