

ORPINE

Meaning: Orpine is a perennial herb (Sedum telephium) known for its succulent leaves and clusters of small, star-shaped flowers, often used for its soothing properties in herbal medicine.

1. The herbalist recommended orpine for its soothing properties.
2. She admired the delicate flowers of the orpine growing on the rocky cliff.
3. In traditional medicine, orpine has been valued for its potential health benefits.
4. The garden was filled with vibrant orpine, adding a touch of color to the landscape.
5. Orpine thrives in dry, sandy soil, making it a resilient addition to any garden.
