

OSCULATING

Meaning: Osculating refers to the act of two bodies moving in a close, dynamic relationship, often involving mutual attraction or the approximation of geometric shapes, such as circles, to a curve at specific points.

1. The two planets are osculating around each other in a complex gravitational dance.
2. The mathematician described the osculating circles that approximated the curve at various points.
3. As the dancers moved closer together, they seemed to be osculating under the soft glow of the stage lights.
4. The osculating motion of the pendulum created a rhythmic and soothing sound in the quiet room.
5. In physics, osculating orbits provide a useful way to analyze the behavior of celestial bodies over time.
