

OTORRHEA

Meaning: Otorrhea is the discharge of fluid from the ear, often associated with infections or other ear-related conditions.

1. Otorrhea can be a symptom of an underlying ear infection that requires medical attention.
2. The doctor explained that otorrhea might indicate a ruptured eardrum or other serious issues.
3. After swimming, she noticed a clear otorrhea, prompting her to consult an ENT specialist.
4. Persistent otorrhea in children is often linked to chronic sinusitis or allergies.
5. Treatment for otorrhea typically includes antibiotics if a bacterial infection is present.
