OURANG

Meaning: 'Ourang' refers to the orangutan, a species of great ape known for living in tropical forests and primarily foraging for fruit and leaves in treetops.

1. The scientific name for the orangutan is Pongo, which is derived from the Malay word for "person of the forest."

2. During the day, ourangutans forage for fruit and leaves high in the treetops of their tropical habitats.

3. Conservation efforts are crucial to protect ourangutans as their populations continue to decline due to habitat loss.

4. In the wild, ourangutans are known for their intelligence and ability to use tools to help them gather food.

5. The bond between a mother and her baby ourangutan is incredibly strong, with mothers often carrying their young for several years.
