

OVERCATCH

Meaning: Overcatch refers to the excessive capture of fish beyond sustainable limits, potentially harming fish populations.

1. Overcatch can lead to a significant decline in fish populations if not managed properly.
2. The fisherman was careful not to overcatch during the spawning season to protect the species.
3. Regulations were put in place to prevent overcatch and ensure sustainable fishing practices.
4. Environmentalists raised concerns about overcatch affecting the balance of the marine ecosystem.
5. Local authorities implemented strict quotas to combat the issue of overcatch in the region.
