

OVERFISH

Meaning: Overfish: to catch fish from a body of water at a rate that exceeds the species' ability to reproduce, leading to a decline in fish populations.

1. Overfishing has led to a significant decline in fish populations around the world.
2. Many coastal communities are struggling because overfishing has depleted their local resources.
3. The government has implemented stricter regulations to prevent overfishing in endangered waters.
4. Environmentalists are advocating for sustainable practices to combat the effects of overfishing.
5. If we continue to overfish, we risk destabilizing entire marine ecosystems.
