

OXLIP

Meaning: Oxlip is a noun referring to a type of flowering plant, specifically a Eurasian primrose (Primula elatior) known for its yellow flowers and preference for damp habitats.

1. The oxlip flowers bloomed beautifully in the spring garden.
2. She pointed out the rare oxlip among the more common primroses.
3. During our hike, we stumbled upon a patch of vibrant oxlips by the stream.
4. The gentle fragrance of the oxlip filled the air as we walked through the meadow.
5. Oxlips are often found in damp, shady areas, thriving in their natural habitat.
