

PACHYDERM

Meaning: Pachyderm refers to a thick-skinned mammal, particularly elephants and rhinoceroses.

1. The elephant is perhaps the most well-known pachyderm due to its massive size and intelligence.
2. During our safari, we were lucky enough to observe a herd of pachyderms roaming freely in their natural habitat.
3. Pachyderms have thick skin that helps protect them from environmental elements and predators.
4. Conservation efforts are crucial to ensure the survival of endangered pachyderm species like the African rhino.
5. Many people are fascinated by pachyderms, often visiting wildlife parks to learn more about these incredible animals.
