

PARALLELIZE

Meaning: To parallelize means to divide a process into smaller tasks that can be executed simultaneously to enhance efficiency and reduce completion time.

1. To improve efficiency, developers often seek to parallelize tasks in their software applications.
2. The research team was able to parallelize the computation process, significantly reducing the time required for analysis.
3. By learning how to parallelize data processing, the engineers enhanced the performance of their machine learning algorithms.
4. The goal of the new framework is to automatically parallelize workflows, allowing for seamless scalability.
5. When you parallelize your workload, you can achieve faster results without compromising quality.
