

# PARTIALIST

*Meaning: Partialist: a person who emphasizes or focuses on specific aspects or sectors, often at the expense of a broader or more holistic perspective.*

1. The economist was often criticized for being a partialist, focusing too narrowly on specific sectors of the market.
2. In discussions about public policy, her partialist views overshadowed broader considerations for societal well-being.
3. As a partialist, he believed that understanding individual components was essential before grasping the whole system.
4. Critics argued that his partialist approach limited the depth of his analysis and overlooked interconnected factors.
5. The partialist perspective offered valuable insights, but it also raised questions about the completeness of the conclusions drawn.
