

PARTICULARISM

Meaning: Particularism is the belief that specific contexts and individual circumstances should take precedence over universal principles in moral reasoning and decision-making.

1. Particularism emphasizes the importance of specific contexts and individual circumstances over universal principles.
2. In philosophical debates, particularism challenges the idea that moral rules can be universally applied without considering unique situations.
3. The artist's work reflects a form of particularism, celebrating the distinct cultural elements of her heritage.
4. Critics argue that particularism can lead to relativism, making it difficult to establish common ethical standards.
5. In politics, particularism often manifests in policies that favor local interests over national or global concerns.
