

PELAGE

Meaning: Pelage refers to the fur or hair covering the body of a mammal, particularly in relation to its texture and coloration.

1. The thick pelage of the Arctic fox helps it survive in extremely cold temperatures.
2. During the summer months, the pelage of the deer changes to a lighter shade for better camouflage.
3. Researchers studied the pelage of various mammals to understand how fur density affects thermal regulation.
4. The luxurious pelage of the Persian cat requires regular grooming to maintain its beauty.
5. In some species, the color and texture of the pelage can indicate health and vitality to potential mates.
