

# PELLICULAR

*Meaning: Pellicular refers to something that is thin, film-like, or membrane-like in structure, often serving as a protective layer.*

1. The pellicular surface of the leaves caught the morning dew, glistening in the sunlight.
2. During the experiment, we observed the pellicular layer forming a protective barrier around the cells.
3. The artist chose a pellicular texture for her sculpture, giving it an intriguing depth.
4. In his studies, he noted how pellicular materials interacted differently with various environmental factors.
5. The pellicular nature of the film made it ideal for preserving the freshness of the food inside.
