

PHONETIZATION

Meaning: Phonetization is the process of representing spoken language sounds in written form to aid in pronunciation and understanding of dialects or accents.

1. Phonetization of the text allowed for clearer pronunciation in the language learning app.
2. The researchers focused on the phonetization of dialects to understand regional accents better.
3. Effective phonetization can significantly improve the accessibility of written languages for non-native speakers.
4. Teachers often emphasize phonetization to help students grasp the nuances of spoken English.
5. The phonetization process transformed the written script into a format that was more intuitive for oral communication.
