

# PICUL

*Meaning: Picul: a traditional unit of weight used in Southeast Asia, typically equivalent to about 60 to 100 kilograms, often employed in agricultural trade.*

1. The picul is a traditional unit of weight commonly used in Southeast Asia.
2. Farmers often sell their rice by the picul, making it an important measure in local markets.
3. In some regions, a picul is equivalent to around 60 kilograms or 132 pounds.
4. The use of the picul has declined with the introduction of more standardized measurement systems.
5. Historically, the picul was also used for trading spices and other valuable commodities.
