

# PIMELIC

*Meaning: Pimelic refers to a type of dicarboxylic acid, specifically pimelic acid, which is involved in biochemical research and fatty acid metabolism.*

1. Pimelic acid is often used in biochemical research to study fatty acid metabolism.
2. The researchers synthesized a new derivative of pimelic compound to enhance its effectiveness.
3. In organic chemistry, pimelic structures can play a crucial role in the development of pharmaceuticals.
4. The team discovered that pimelic-based molecules exhibited unique properties in their experiments.
5. Understanding pimelic interactions is essential for advancing materials science applications.
