

PINASTER

Meaning: Pinaster refers to a species of pine tree, specifically the maritime pine (Pinus pinaster), known for its adaptability to Mediterranean climates and use in reforestation.

1. The Aleppo pine, scientifically known as *Pinus halepensis*, is often confused with the Pinaster species in coastal regions.
2. Pinaster trees are well-suited for reforestation projects in Mediterranean climates due to their resilience.
3. The unique aroma of the resin from the Pinaster tree adds a distinctive note to the local ecosystem.
4. In many coastal areas, the Pinaster provides essential habitat for various wildlife species.
5. The timber harvested from Pinaster is valued for its strength and durability in construction.
