

PINFEATHER

Meaning: Pinfeather: a developing feather in birds that is still encased in a sheath and not yet fully formed or functional.

1. The young bird was still developing its pinfeathers, signaling that it was not yet ready for flight.
2. As the chick grew, its pinfeathers began to emerge, gradually replacing the soft down.
3. During the molting season, the presence of pinfeathers can often indicate a bird's development stage.
4. Birdwatchers often look for pinfeathers on fledglings, as they are a sign of maturity and readiness to leave the nest.
5. The veterinarian explained that the pinfeathers should be treated gently to avoid causing any discomfort to the bird.
