

PINWORM

Meaning: A pinworm is a small parasitic worm (Enterobius vermicularis) that infects the intestines, primarily causing itching around the anus, especially in children.

1. A pinworm infection is commonly characterized by itching around the anus.
2. Children are particularly susceptible to pinworm infestations due to their habits of playing in dirt and poor hygiene.
3. To eliminate pinworms, doctors often recommend a specific course of medication and careful cleaning of bedding.
4. Symptoms of pinworm infections can be quite bothersome, especially at night when the worms are most active.
5. Preventing pinworm transmission involves frequent handwashing and maintaining clean living environments.
