

PLANO-CONICAL

Meaning: Plano-conical refers to a geometric shape that has a flat (plano) surface on one side and a conical shape on the other, often used in optical devices to manipulate light.

1. The engineer designed a plano-conical reflector to enhance the focus of the light beam.
2. In optics, a plano-conical lens can be used to create unique visual effects in photography.
3. The plano-conical shape of the object allowed for efficient fluid flow in the experimental setup.
4. Architects often incorporate plano-conical elements into structures to achieve a modern aesthetic.
5. This plano-conical model demonstrated the principles of light refraction and dispersion effectively.
